Abstract (en)

[origin: DE19712239C1] The casing of the electric apparatus, specially for a supply meter, comprises a bottom part (1) and a closing part (2), both configured as a single plastic piece. Said closing part is lead sealed when closed. The closing part (2) can be snapped onto the bottom part (1). The bottom part (19) penetrates the closing part (2) with a plumbing strand (4) forming a single-piece. Said strand stands out and has an eyelet on its protruding area (5) to pass through a lead wire.
