Abstract (en)
A stuffed toy (1) of a human or animal shape, comprises a head section (2), a trunk section (3), and first and second arm sections (4, 5). The first arm section (4) has a width larger than that of the second arm section (5), and a wadding for the first arm section (4) is formed by a pillow-core material (11) separated from a wadding for the trunk section (3), so that the first arm section (4) forms a pillow (12). The first arm section (4) extends linearly away from the trunk section (3) to form a receptacle space (15) between the first arm section (4) and the trunk section (3) for receiving a pillow user. <IMAGE>
