Abstract (en)

Dispenser (10) head for uniformly dispensing glue in and around a groove of a laminate floor board. The glue is supplied via a wide outlet opening (12), located between a first V-shaped part (13) of the dispenser head, under operational conditions located before the outlet opening and intended for centring the dispenser head and a second V-shaped part of the dispenser head, under operational conditions located behind the outlet opening and intended for immediately dispensing the glue in a groove. The dispenser head (10) can be integrated with a cap for a glue-bottle or with a glue-gun. <IMAGE>
