Abstract (en)

[origin: EP0970891A2] The supporting inserts are in the form of at least two rigid, panels (7) protruding upwards from the base of the container (1). The panel-type inserts have cavities (8) open at the top and fit into upward-pointing slots (14) pointing upwards from the container's base, in holders (9,10) across the longitudinal direction of the inserts. The holders are in the form of folded spacer pieces shaped into hollow bodies into which a partition (12) is inserted to separate the at least two objects per container.
