Abstract (en)

[origin: EP0970914A2] A telescopic arrangement on a base casing (13) has retractable and insertable telescope lengths (14-18) at least one of which swivels towards the tiltable jib-arm (12) by means of a bend point (19) possessing an adjusting mechanism and closed and opened by a hinge. The innermost telescopic section (18) at least can be swiveled and adjoins at least one non-bent section (14). The hinge of the bend point is on the underside of the jib-arm, and the adjusting mechanism is on the top of the jib-arm.
