Abstract (en)
[origin: EP0971084A1] The abutment has a cylindrical jacket (1) which has two end surfaces (2,4) from which a serrated support surface is formed. An intermediate base is also formed that extends from one side of the jacket to another. An opening is provided in the base of the abutment to enable it to be attached to the formwork with at least one other opening provided in the jacket.
