Abstract (en)

An oil-water emulsion for photographic application said emulsion comprising oil, water, gelatin and a surfactant, said gelatin consisting of a) a fraction of gelatin molecules with a molecular weight smaller than 70 kDa, said fraction forming 30-90% by weight on the basis of the total weight of gelatin in the emulsion, b) a fraction of gelatin molecules with a molecular weight higher than 130 kDa, said fraction forming 5-38% by weight on the basis of the total weight of gelatin in the emulsion, c) the fractions of gelatin molecules with a molecular weight higher than 130 kDa and with a molecular weight smaller than 70 kDa are further related by having as lower limit % fraction  $> 130 \text{ kDa} = 0.455 \times (100 - \text{\AA\% fraction} < 70 \text{ kDa})$  and as upper limit % fraction  $> 130 \text{ kDa} = 0.606 \times (100 - \text{\AA\% fraction} < 70 \text{ kDa})$  d) whereby in total  $\text{\AA\% fraction} < 70 \text{ kDa} + \text{\AA\% fraction} > 130 \text{ kDa} \leq 100\%$ .
