Abstract (en)

[origin: DE19829486C1] The holder includes a bending mould unit (BT) which has a recess (AN) adjusted to the outer form of the female connector (SB). The recess has snap-in elements which can be engaged in corresponding recesses (RA) of the female connector. A support unit (AV) is provided at the bending mould unit on the cable supply side of the female connector. The support unit has a clamping slot (KSL) in which the cable sheath is fixed and the cable screen is electrically contacted. The bending mould unit has snap-on elements (RSG) for fixing in a screen housing (SG). The entire arrangement is clamped on a mounting plate using snap-on elements (RL,RMP).
