Abstract (en)
[origin: DE19713780A1] The invention relates to a food processing installation comprising a loading system, wherein a drive mechanism causes a processing chamber (20, 30) to be loaded with displaceable food shelves. In order to guarantee the best possible circulation of air in the processing chamber, the drive mechanism (1) is configured as a linear drive mechanism which is preferably arranged outside said processing chamber (20, 30).
