Abstract (en)
[origin: WO9843507A2] The invention relates to a lace fastening system with at least one device for accommodating the traction elements (4). This device for accommodating the traction elements (4) comprises a pull-in and tightening system, and can be attached to a fastening part (1). The inventive lace fastening system also has guides (2) for the traction elements, said guides being arranged opposite each other on the fastening parts (1) and guiding the traction element (3) in such a way that said traction element (3) is led back and forth alternately between the traction element guides (2) on the fastening parts (1).
