Abstract (en)
[origin: WO9844906A1] The invention concerns a cosmetic or dermatological composition designed for forming a film, on a keratin substrate, in cross-linked hybrid material. Said composition is of the sol/gel type and is obtained by mixing: (a) at least an organometallic compound; (b) at least a functionalised organic polymer or said polymer precursor, or at least a functionalised silicone polymer or said polymer precursor, the latter precursor being different from (a); (c) a sufficient amount of water for hydrolysing the organometallic compound; and (d) optionally at least an alcohol; said film being non-reversible.
