Abstract (en)

[origin: FR2760639A1] The invention concerns a combination for preventing or treating osteoporosis in an aged subject, comprising as combined active principles metallic calcium and at least one vitamin D. The invention is characterised in that it comprises: a calcium salt dispersed in an liquid aqueous medium, said salt being substantially non-soluble in the liquid aqueous medium; at least one vitamin D; an agent for dissolving the vitamin D in the aqueous medium; and a gelling agent, for increasing the viscosity of the aqueous medium and maintaining the non-soluble calcium salt in homogeneous suspension in this aqueous medium.
