Abstract (en)

[origin: EP0972618A2] The cutting machine has an additional display (12) designed as a changeable touch screen located near the display (11), so that with this, scanning symbols (17) and-or operating element symbols (18) and-or by means of a finger operated computer mouse (19) are indictable. The control of the auxiliary display and the touch matrix, results by the operator computer.
