Abstract (en)
[origin: EP0972711A2] An imaging forming device for separating a printable medium (10) from a protective backing of a continuous strip (12) attached thereto, the imaging forming device includes a stepped stripper roller shaft (38) encircled by a roller sleeve (42) adapted to press a platen (22) of the device wherein the imaging forming device causes the continuous strip (12) to pass over a stripper bar (28) and directs the protective backing to move under the stripper bar (28) and between the platen and the roller sleeve while the printable medium continuously moves outward of the device from over the stripper bar. <IMAGE>
