Abstract (en)

The present invention relates to a process for producing a powder from a tablet, the tablet having a tensile strength of at least 5 kilo Pascal, the tablet comprising at least 2% by weight of surfactants, whereby the process is characterised in that it comprises a first step of submitting the tablet to mechanical degradation, and a second step of sifting to obtain the powder, whereby the powder obtained comprises less than 4% per weight of particles passing through a 150 micro meter sieve.
