Abstract (en)

[origin: EP0972903A2] The door threshold profile (10) has a metal body (11) secured at the floor side. A cover (12), of a heat insulation material, is in a release fitting at the outer side. The side towards the door is covered by a bar (13) of heat insulation material. The covering bar (13) is a separate component from the covering (12). The edge zone (14) of the metal body (11), at the inner door side, butts as a seal against the covering (12), with the covering (12) locked in place at the metal body (11) at a point below the butting joint (15).
