Abstract (en)
[origin: DE19715210A1] The invention relates to a crushing gap adjustment device for a crushing machine comprising at least two cylinders (1, 2) between which malt is ground in a gap (22). The inventive machine is particularly suitable for wet malt mills comprising a continuous, tool-less adjustment device for the crushing gap (22) using an eccentric bearing (3) of at least the first (1) of two cylinders (1, 2).
