Abstract (en)
[origin: EP0974712A2] The placed-on strips (2a) of the middle part are fixed to a roofing or ridge slat (5). The air-permeable middle strips (2b) on each side of, and adjoining, the placed-on strips are joined to outer edge strips (10) placed on roofing. The middle part consists of a thin-walled, sheet-like length of metal or metal alloy, preferably aluminum, and the edge strips consist of a deformable length of material preferably lead. The middle and edge strips are non-flammable.
