Abstract (en)

A base element (9) is detachably connected by means of a snap-in fastening, consisting of a lug (13) engaging with a cavity (14), to a sleeve (8) open at least on one side, near a section (2) of the handle or element. When connected, the sleeve encloses the base element which is spring-connected to the lug. The cavity is positioned in an end of the sleeve facing away from the opening in the sleeve.
