Abstract (en)

[origin: EP0974787A2] The casing part includes a main body, a space formed in the main body for receiving at least one component, and an insertion aperture, especially for inserting the component into the reception space. A through-put area is provided, through which the component in the reception space is connected with a supply arrangement, especially a voltage source. The main body is formed from an elastic, soft material, and is provided with a passage aperture in the through-put area, in which a socket element is arranged in a sealed manner.
