Abstract (en)

[origin: EP0974791A2] At least parts of the top covering grid plate (3) have downward chamfered edges (7) and have sides (4) fixed to the end side ends of the covering grid plate. At least one first (18) and second (22) connecting element are positioned near the top end of the sides, and near the end sides (7) of the covering grid plate respectively. The side has at least one holder element fixed to it. The holder element on its end facing away from the first connecting element has a knob (13) which goes through a matching opening (25) in the side.
