Abstract (en)

A preheating oven (1), particularly for panels (20) to be molded, comprising, inside a preheating chamber (2), two mutually spaced wingfitted conveyors (3,4). The wings (10) of the two conveyors (3,4) engage the opposite edges of panels (20) being preheated in order to support them at a substantially horizontal plane of arrangement and convey in succession the panels (20) being treated from an inlet region (30) to an outlet region (31). <IMAGE>
