Abstract (en)  
[origin: WO9932012A2] The device to adjust the height of panels, more particularly, working tables, comprises at least one console (12), which is mounted in a rack and fitted with at least two vertical translational lifting elements (14). A cover (13) is screwed on the console (12). An opening is formed between the console (12) and the cover (13). The lifting elements (14) are located in holes (121) in the console (12). The lifting elements (14) are inserted in the holes (121) in such a way that they cannot rotate.
