Abstract (en)

[origin: WO9928104A1] The invention relates to device (1) for heating and applying plastic materials, comprising a heatable supply unit with a fill hole (5) and a screw conveyor and a removal unit (28, 30) for the plastic materials which are ready for processing. The first supply unit (2) with a screw conveyor is connected to a second supply unit (20) with a screw conveyor and the second supply unit (20) is connected to a tube (23). The removal unit (28, 30) is arranged at the other end of the tube (23). At least two sections of the device (1) can be heated separately.
