Abstract (en)

[origin: WO9835983A1] The invention relates to the use of a peptide with the sequence Z-Phe-X-Gly-Y or a mixture of said peptides to manufacture a drug for the therapeutic treatment of the human or animal body, especially in cases of diseases involving malign cell growth or diseases with antigen-specific cell immune reactions, wherein Z is an N-terminal protective group or hydrogen, X is a natural amino acid and Y is carboxyl-OH or a synthetic cleavage related C-terminal group or an oligopeptide from natural amino acids. The invention also relates to novel peptides for such uses.
