Abstract (en)

[origin: DE19715872A1] The object of the invention is to improve the stability, fragrance, cleaning power and rechargeability of gelled cleaning agents, preferably for flush toilets. This object is attained by preparing a gelled, shear-reducing cleaning agent which contains 1 to 5 % by weight of a polysaccharide, 3 to 25 % by weight of a C8-C22 alkylpolyglycoside as a component of the surfactant system, up to 15 % by weight fragrance and if required other ingredients such as scale preventives, dyes, disinfectants, nacreous brighteners, stabilisers, cleaning power reinforcing agents and odour absorbers. The cleaning agent has a viscosity from 30,000 to 150,000 mPas.
