Abstract (en)

[origin: FR2762010A1] The invention concerns a gene involved in the fruit body development of the edible mushroom *Agrocybe aegerita* and the use thereof to induce said fruit body development in basidiomycete fungi. The invention concerns in particular a nucleotide sequence corresponding to: a) a sequence according to SEQ ID N DEG 1 partially or wholly; b) a sequence hybridised with a); or c) a sequence with at least 80 % homology with a) or b).
