Abstract (en)
[origin: DE19708305A1] The invention relates to an electric capacitor, especially a film or stack capacitor, with an inner series connection, comprising at least two plastic films (1,2) which are provided with metal layers (3,4,5). Both metal layers (3,4) are separated from the first plastic film (1) by a metal-free strip (8) which is covered by metal layers. The metal layers have a circular or elliptical cross section and define the capacitance of the capacitor.
