Abstract (en)
[origin: FR2780267A1] The vacuum cleaner has on a wall (4) of the motor unit (2) a guide (13) that engages the edge (23a) of the rigid plate (9) that is attached to the dust collection bag. As the cover (5) of the vacuum cleaner is closed the guide ensures the rigid plate is correctly positioned to ensure correct sealing round the dust collection bag.
