Abstract (en)
[origin: EP0976501A2] The tool has a cam control sleeve (2) at its head side (7), of which it is provided with at least one projection (8). This is designed so that the track (3) on one side (14) of the projection (8) is flat and rising uniformly, falling abruptly on the other side (16) of the projection. The course of the track (3) is designed for interrupting. So that the contact between the ball (10) and the track (3), is interrupted for a short time, with the hammer mechanism when going along.
