Abstract (en)
[origin: EP0976672A2] The transport system, to carry printed sheet sections (12,14,16) to a binder, has an initial chain conveyor (10) moving at a constant speed. A second conveyor chain (20) moves at a variable speed, with a system (24) to hold the printed sections (12,14,16) at set positions on the conveyor (20). The first conveyor (10) matches up with the second conveyor (20) at a transfer point (P) for the printed sections (12,14,16).
