Abstract (en)
[origin: EP0976893A2] An access panel (1) for poles, constituted by a vertically elongated and shaped wraparound shell (2) which is externally provided, proximate to its ends, with two recessed seats (5,6) for the snap insertion of rustproof retention bushings (8) for respective effraction-resistant fixing screws (12) which are screwed substantially at the center of corresponding shaped brackets (21) for coupling to the pole which, at the end directed toward the center of the shell (2), are fork-shaped for a nonrotational coupling with pins (23) located inside the shell (2); the shell (2) has, toward the pole and in a peripheral region, a perimetric channel for a gasket. <IMAGE>
