Abstract (en)
[origin: EP0976986A2] The wall of the blowout shaft has an aperture, through which the light housing (19) with a light in (23) extends into the shaft. The light housing has inlet and outlet apertures, which extend into the blowout shaft, allowing through flow of the light housing with cool air. From the light housing extends a first air guide flap (29) into the area of an inlet aperture of the housing, and conducts a part of the air blown through the blowout shaft into the light housing.
