Abstract (en)

[origin: WO9847410A1] An improved drawer slide member and drawer slide undermount bracket. The drawer slide member (96) comprises a vertical web (97) having guide apertures with angled sides leading to a slot (59) adapted to receive support tabs (31) projecting from an undermount bracket. The undermount bracket, or shelf mount bracket, is longitudinally restricted from motion, and the support tabs (31) thereby locked in the slots (59), by lock tabs (35) located on a flexing finger (37) within the undermount bracket which are positioned in a lock tab aperture in the web of the slide member.
