Abstract (en)
[origin: DE19803999A1] The invention relates to a fitted cooling device comprising a heat-insulated housing (10) and at least one heat-insulated door (11), both of which at least have components made of a metallic material. According to the invention those sections of the outer areas (14) of the elements made of metallic material which are visible when the device has been installed are fitted with a layer (19) which is in a decorative finished state whereas the remaining sections (15, 16, 17), which are not visible after installation of the device, have a basic coating (20) serving as rust protection.
