Abstract (en)

[origin: WO9845747A1] The frame comprises lens (L) mounting means (7) that form a first eyelet (7B), two arms (1), each of which forms a second eyelet (1A), and hinges (9) for connecting said arms (1) to the mounting means (7), said hinges each comprising a hinge pin (21) which passes through said first and said second eyelet; the hinge pin (21) has a head (21D) and a shank with a transverse hole through which the wire forming the corresponding arm (1) passes, and the two eyelets (7B, 1A) are located between the head (21D) of the pin and the transverse hole.
