Abstract (en)

[origin: DE19632117C1] The invention concerns a data medium for transmission of electrical signals to a read or write station with a data medium body (2) in which a semiconductor chip (3) is constructed with an integrated electronic circuit. The data medium (2) has two cardboard or paper layers (6, 7), between which a stiffening element (8) is inserted which at least partly surrounds the semiconductor chip (3).
