Abstract (en)
[origin: EP0978357A2] The cutting assembly comprises a product transport system with an air table (12) and a cutting machine (7). The transport system has at least one set of pincers (6) to hold the goods. The pincers are mounted on a carriage (5) and are adjustable in height. The carriage moves on a guide rail (3) and pulls the product over the air table. The guide rail has a curved section and the uncut product is brought from the operator side of the cutting machine by the pincers to a loading side away from the operator.
