Abstract (en)
[origin: EP0978467A2] The laying-out device has sheet brakes (27) which can be adjusted transversely to the processing direction. They include a brake element (24) subject to vacuum, and a sheet support (28) running transversely to the processing direction. The paper support consists of an adapted sheet brake, in which the brake element is replaced by a support element (25) not subject to vacuum.
