Abstract (en)
[origin: EP0978475A2] The mattress making device puts the mattress core (2) in the cover (3) and from a resting table (5) for closing it. To close the open end (3a) of the cover, there is a sewing machine (8) arranged so that a feed device (12, 14, 15) takes it along the sewing edge and then to a region outside the intermediate cavity. The resting table is in this cavity during the sewing process.
