Abstract (en)
The facade clamp (10) is made of metal and comprises a base plate (11) and two initial clamps (12, 13), which are for suspension in the base plate (11). In the facade clamp a facade plate can be suspended. The base plate has two large, rectangular breakthroughs (16), above which are arranged two narrow rectangular slots (17). The breakthroughs and the slots are matched to the width of the initial clamps. In the areas of the breakthroughs and slots, the base plate is provided with bends (18), which provide for a free space (19), which with regard to its dimensions corresponds to those of the initial clamps. The initial clamps are so formed that in the fitted state they are arranged with their area (20) within the free space (19). Hook components (24) are inserted through openings on the narrow side of the facade plate.

Abstract (de)
Es ist eine mehrteilige Fassadenklammer (82; 87) zum Einhängen einer Fassadenplatte (80; 85, 86) beschrieben, die mit einer auf einer Unterkonstruktion befestigbaren Grundplatte und mit mindestens einer Anfangs- oder Fugenklammer versehen ist, die unter einem Formschluß lösbar an der Grundplatte befestigbar ist, und die ein Hakenelement aufweist. Das Hakenelement ist in eine an einer Schmalseite der Fassadenplatte (80; 85, 86) vorgesehene, dem Hakenelement zugeordnete Öffnung (83; 88) einführbar. <IMAGE>
