Abstract (en)
[origin: WO9847452A1] A compression bandage is provided comprising a longitudinal, substantially elasticated strip of material having first and second ends and provided with a guideline extending from said first end to said second end, characterised in that the general disposition of the guideline is non-parallel with respect to at least one of the edges of the strip. The width of said first end may be narrower than that of said second end or strip may have parallel sides with the guideline extending generally diagonally along its length.
