Abstract (en)
[origin: DE19718472A1] A flatbed knitting machine has at least two needle beds, at least one knitting system, at least one pull-off device and a pull-off comb. To prevent the already knitted articles from being caught in the pull-off comb, a pull-off comb covering device (6) covers the comb hooks (2) during at least part of the rising motion of the pull-off comb (1).
