Abstract (en)  
[origin: FR2762921A1] The invention concerns an electric cable (7) for transmitting audio signals, comprising one or several conductor(s) (71, 74) protected from adsorption of molecules present in the air. The conductors (71, 74) are arranged in a tube (75) made in a material with adsorbent properties. The invention is useful in particular in electroacoustics.
