Abstract (en)
[origin: EP0979722A1] The present invention provides a low temperature heat shrinkable film for labeling comprising at least one layer of a thermoplastic resin, in whose correlation diagram showing the relation between the heat shrinkage percentage Y at 80 DEG C in one direction and the heat shrinkage time t ($1 \leq t \leq 5$), the gradient Y' is in an area between the gradients satisfying Equations 1 and 2 and the heat shrinkage percentage Y is in an area between the heat shrinkage percentages satisfying Equations 3 and 4: <MATH> <IMAGE>
