Abstract (en)
[origin: EP0979907A2] The contact surface runs in the area of the lateral longitudinal ends of the locating plate and the side plate. The locating plate and the side plate are formed as multi-layer light concrete plates and have outer surfaces and inner surfaces running at right-angles to one another. The inner surface (6) of the locating plate (2) and the inner surface (4) of the side plate (1) have a connecting surface (6A, 4A), to which at least one reinforcement component (3) can be applied. One side surface of the reinforcement component (3) abuts as locating surface (3A) on the connecting surface (6A) of the locating plate (2) and one side surface abuts as locating surface (3B) on the connecting surface (4A) of the side plate (1).
