Abstract (en)  
[origin: EP0979977A2] The portable air conditioning plant has a casing containing an evaporator (1) and a condenser (2), sprayed with water to cool it through a distribution device. The water drips from the evaporator and is collected in a container (4), from which it passes through an outflow outlet (6), in a raised position relative to the container, to a collecting container (7), and thence via a supply device (8) out through a connecting line (9).
