Abstract (en)  
A terminator (8) for terminating the shield of each of a plurality of shielded cables, comprising an electrically conductive body (10) with a plurality of through holes (12), each for receiving one of the shielded cables, and terminating means (14) insertable between the shield and the insulator(s) of the conductor(s) of the cables to effect wedging in the holes thereby to make electrical contact between the shield and the body. <IMAGE>
