Abstract (en)
[origin: WO9850633A1] The invention relates to a prefabricated element (17) for the manufacturing of a road surface (1), which element is made of reinforced concrete, and in longitudinal direction is provided with a first side (8) which shows a first profile (10) over at least part of its length, and a second side (9) opposite the first side (8), which second side (9) shows over at least part of its length a second profile (11) that is complementary to said first profile (10). The invention also relates to a process for the manufacturing of a road surface comprising above described elements.
