Abstract (en)

A drip chamber for body fluid infeed and discharge kits, comprising a tubular external enclosure (2) in which a first end is closed by a connector provided with at least one tube for connection to the external circuit and a second end lies opposite to the first end; the enclosure accommodates a filtering element (7) composed of a substantially cylindrical filtering body (8) which forms an interspace with the enclosure; the filtering body has an end which is internal to the enclosure and is closed by a bottom (4) and an end which is rigidly coupled to a closure element (10) which is inserted in the second end of the enclosure and is provided with a tube (11) for connection to the external circuit; the filtering body (8) and the closure element (10) are monolithic. <IMAGE>
